Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Arthropoda	Malacostraca	Decapoda	Potamidae

Taxon Name: *Geothelphusa levicervix* (Rathbun, 1898)

Taxonomic Notes:

Subfamily Potamiscinae.

Assessment Information

Red List Category & Criteria: Endangered B1ab(iii)+2ab(iii) [ver 3.1](#)

Year Published: 2008

Date Assessed: January 1, 2008

Justification:

Listed as Endangered because its extent of occurrence is less than 100 km², all individuals are in only two localities which are not in a protected area. In addition, they are found in locally small numbers, there is continuing decline in the extent and quality of its habitat from human-induced disturbance and pollution.

Geographic Range

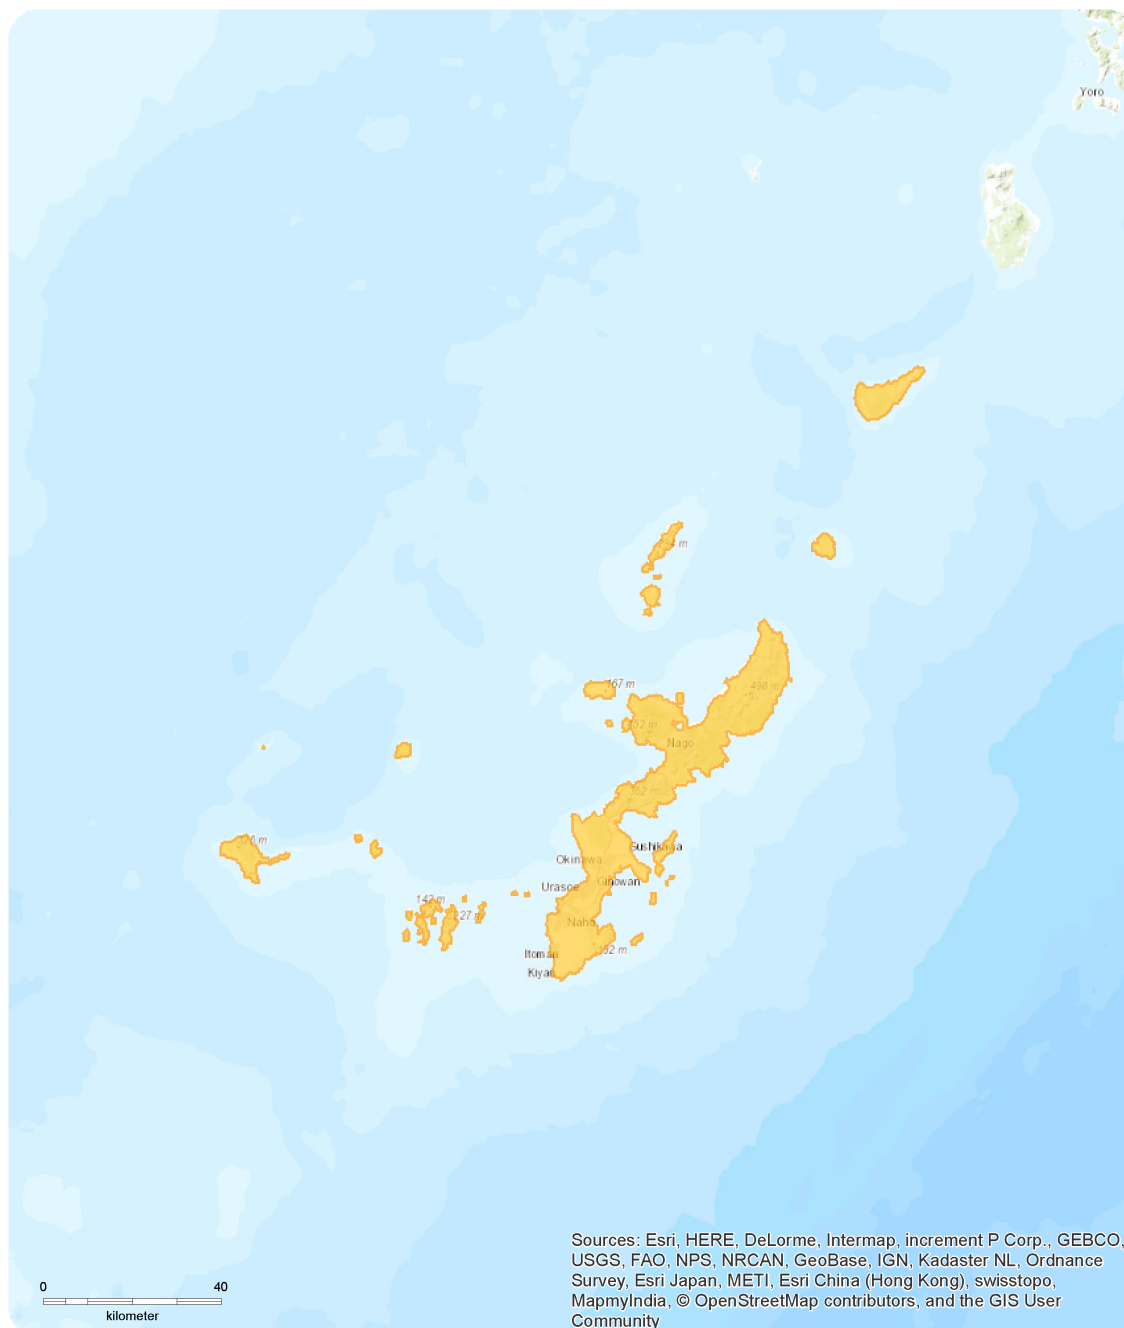

Range Description:

Japan: Tokashiki Island, Kerama Group, Central Ryukyu Islands.

Country Occurrence:

Native: Japan (Nansei-shoto)

Distribution Map

Geothelphusa levicervix

Range

■ Extant

Compiled by:

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There is no information on population size, abundance, or trends.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

Collected from a very small stream less than a metre in width, and about 5 cm in depth. Crabs were seen in the stream itself or along the banks.

Systems: Freshwater

Threats (see Appendix for additional information)

Habitat loss and pollution.

Conservation Actions

No conservation measures are known to be in place for this species and it is not found in a protected area.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
5. Wetlands (inland) -> 5.1. Wetlands (inland) - Permanent Rivers/Streams/Creeks (includes waterfalls)	-	Suitable	Yes

Threats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Threat	Timing	Scope	Severity	Impact Score
9. Pollution -> 9.1. Domestic & urban waste water -> 9.1.3. Type Unknown/Unrecorded	Ongoing	-	-	-
	Stresses:	1. Ecosystem stresses -> 1.2. Ecosystem degradation		
9. Pollution -> 9.2. Industrial & military effluents -> 9.2.3. Type Unknown/Unrecorded	Ongoing	-	-	-
	Stresses:	1. Ecosystem stresses -> 1.2. Ecosystem degradation		

Research Needed

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Research Needed
1. Research -> 1.2. Population size, distribution & trends
1. Research -> 1.3. Life history & ecology
1. Research -> 1.5. Threats
1. Research -> 1.6. Actions
3. Monitoring -> 3.1. Population trends

Additional Data Fields

Distribution
Estimated extent of occurrence (EOO) (km ²): 100
Number of Locations: 2
Population
Population severely fragmented: No
